

About Techsol's People

\$Id: index.xml 2421 2011-09-21 18:01:21Z brolin \$

Here is some information on the people who made the Medallion System such a success!

NAME	TITLE	BIOGRAPHY
Brian Empey , B. Sc. (EE), P.Eng.	CEO and Technical Visionary	Having worked in senior management and engineering roles in industrial, medical, and consulting firms of all sizes, Brian founded Techsol in January of 1996 to create specialized products. Unfortunately, the need for cashflow led to custom design contracts for other companies. And the need for a better/faster/cheaper way to create custom products led to the Medallion CPU module vision.
Dallas Foley , CET	Chief Programmer	Dallas's fingerprint is on every aspect of the Medallion Software Architecture. Dallas has worked with Brian and Ray since #1987.
Ray Dougharty , CET	PCB Designer	Ray is an expert at creating dense, low-noise, yet relatively low-cost PCB designs. Ray has worked with Brian and Dallas since #1987.
Karen Empey	Office Administrator	Karen brings 2 decades of business management experience to Techsol. She keeps the office going!
Gorlic Liu , M. Sc. (EE), B. Sc. (CS)	Engineering	Gorlic received a degree in Electrical Engineering before coming to Canada. He designs hardware.

NAME	TITLE	BIOGRAPHY
Brolin Empey	Hacker	Brolin provides IT support and maintains Techsol's Web sites.
Jenny Seck Chai Lai	Production Technician	Before joining Techsol, Jenny completed training and considerable work experience at Apex Micro Manufacturing, where she worked for 15 years. She assembles and repairs products.
Ali Rahmat	Programmer	
Ashley Madigan	Project Administrator and Executive Assistant
