

Medallion Touch Panels

\$Id: index.xml 2621 2012-09-27 00:32:35Z brolin \$

Techsol's touch-panel computers are unique in their value proposition. Not only are they based on a decade of ARM HW development, but they leverage the Medallion System to bring feature-rich SW backed up with unmatched support. Like all Medallion products, these touch-panel computers are not sold as "Linux Compatible", but rather they are shipped with Linux pre-loaded. And like all our products, they are each individually tested running Linux before you get them.

Photograph	Model	Type	Display size (viewable, diagonal)	Display type	Display pixel dimensions
	TSC#35D	IO board + TSCM + Display Board + LCD	3.5#	Color, TFT LCD	qVGA (320×240)
	TSC#43D	IO board + TSCM + Display Board + LCD	4.3#	Color, TFT LCD	WqVGA (480×272)
	TPC#35B	IO board + CPU module + LCD + enclosure	3.5#	Color, TFT LCD	qVGA (320×240)
	TPC#43A	IO board + CPU module + LCD + enclosure	4.3#	Color, TFT LCD	WqVGA (480×272)

Photograph	Model	Type	Display size (viewable, diagonal)	Display type	Display pixel dimensions
	TPC#43B	IO board + CPU module + LCD + enclosure + Power Over Ethernet	4.3#	Color, TFT LCD	WqVGA (480×272)
	TPC#43C	IO board + CPU module + LCD + steel enclosure (“No Plastic!”) + Power Over Ethernet	4.3#	Color, TFT LCD	WqVGA (480×272)
	TPC#35A	SBC + LCD	3.5#	Color, TFT LCD	qVGA (320×240)
