1 Techsol is proud to announce the TPC-35A Medallion Touch Panel Computer.

Delta, British Columbia, Canada - September 26, 2007

After pestering from our customers for years, Techsol is now offering an extremely cost-effective computer with a **Color, TFT LCD and Touch panel** targeting Human-Machine Interface (HMI) applications. This standard, off-the-shelf, ARM-powered, Industrial-Grade, Single-Board Computer (SBC) features:

"This computer provides **more features at a lower cost** than anything else on the market." said Brian Empey, P.Eng., CEO of Techsol. "By putting everything onto a single board, we provide the robustness demanded of our Industrial customers, but at a price-point that even our fiscally-prudent, medical-device customers love!" In fact, this product has been in trials with a number of medical device companies who plan to use it as the HMI for their products. In addition, the design is so flexible that it can be used as a platform for handheld computers too.

Not surprisingly, Techsol has developed many products that use LCDs for its clients. These products range from FDA-approved medical devices to high-volume consumer gadgets. However, Techsol has not had a standard product with a TFT display and touch panel at a cost-effective price point targeting HMI applications until now.

Order Quantity	Unit Price (standard 200 MHz speed)	Discount
10	\$299	base price
100	\$269	10%
1,000	\$254	15%
10,000	\$239	20%

The TPC-35A is available from stock and every unit is tested running Linux before it ships! Single units are available as development kits with full SW development tools and support. Call for pricing.

Embedded Engineering is the same all over the world. Engineers face the same challenges of having too much to do, and not enough time or money to do it with. Techsol's **Medallion** CPU modules address this issue and provide a solution that extends into the production stages of a product, not just the *proof-of-concept* stage like most SBCs.

Techsol's **Medallion** system is unique in the embedded computer world. The **Medallion** Single-board computer product line encompasses multiple CPUs, and different configurations with the same CPU. However, the pin-out and form-factor remain the same. There is one **Medallion** module that is best matched to your application.

By designing with the **Medallion** system, you are effectively **out-sourcing** your CPU design and Linux porting **with no up-front NRE fees!** That lets your team concentrate on the hardware and software portions of your product that your customers see. The result is that **you can create a higher-quality product in a fraction of the time (and cost) of designing everything yourself** from scratch! Plus, the **interchangeable modules extend product life-cycle times.**

For more details, or to request further information, please visit our Web site at medallionsystem.com, call 888 TECHSOL (888 832 4765) or 604 946 8324, or e-mail sales@techsol.ca.

Techsol is headquartered in Delta, British Columbia, Canada, where the mighty Fraser River meets the Pacific Ocean.
